

All kids are welcome!

We do want you to know that we are unable to provide special programming for children with disabilities or special health care needs. We will do our best to facilitate all your child's needs and provide the care they need to safely enjoy our ministry. Only a parent or guardian (over the age of 18) can administer medication to a child, and there will not be a volunteer or staff available to devote their sole attention throughout service to a child.
